PROFESSIONAL SUMMARY

PHP Developer with ~3 years of experience specializing in PHP, WHMCS, MySQL, JavaScript, and jQuery. Experienced in developing and customizing **WHMCS modules, addons, server modules, reports, and client-area themes** based on business requirements.

Hands-on experience with **API integrations, database management, backend development, and third-party service integrations**. Strong understanding of troubleshooting, debugging, and maintaining production applications while delivering scalable and reliable solutions.

SKILLS

Languages: JavaScript, PHP, C

Backend & Frameworks: Laravel, WHMCS, Node.js, React, Redis, MVC

Frontend: React.js

Databases: MySQL, MongoDB, SQL

Cloud & DevOps: Docker, Git, GitHub, System Design

Architecture & Tools: PuTTY, FileZilla, cPanel

EXPERIENCE

PHP Developer **Jun 2023 - Present**

Shine Dezign Infonet Pvt. Ltd. *Mohali, Punjab, India*

- Developed and maintained custom WHMCS modules and addons using PHP, Smarty, JavaScript, jQuery, and MySQL based on business requirements.
- Built and customized server modules, reports, and client-area functionalities to improve automation and user experience.
- Developed and integrated REST APIs and third-party services with WHMCS for business and infrastructure-related workflows.
- Worked on WHMCS hooks, product configurations, custom fields, and backend workflows to extend core WHMCS functionality.
- Implemented and maintained integrations with services such as Proxmox, OpenStack, Google APIs, Fiskaly, and Zoho Books.
- Troubleshot production issues, optimized database queries, and delivered reliable and maintainable PHP-based solutions.

Trainee - Software Engineer **May 2023 - Sep 2022**

Emicon Advisory Services *Mohali, Punjab, India*

- Worked on SQL and PL/SQL development for database-driven applications and business requirements.
- Developed and maintained SQL queries, stored procedures, functions, and database scripts.
- Worked with Oracle Database for data management, query development, and troubleshooting.
- Assisted in database optimization, debugging, and resolving data-related issues.
- Collaborated with the development team to understand requirements and deliver reliable database solutions.

PROJECTS

Spanish Fiscal E-Invoicing Module (WHMCS)

- Developed and maintained a Spanish fiscal e-invoicing integration for WHMCS to automate tax and invoice synchronization for Spanish clients.

- Implemented automatic tax/invoice synchronization based on invoice status and payment events.
- Integrated automated synchronization workflows for paid and canceled invoices, reducing manual tax processing.
- Worked on WHMCS hooks and backend workflows to ensure invoice data was automatically synchronized with the fiscal system.

eKYC Verification Module (WHMCS)

- Developed a KYC/eKYC verification module for WHMCS to verify customer identity before allowing access to products and services.
- Implemented automated checks to ensure customers complete KYC verification before purchasing products or services.
- Added functionality to prompt unverified customers to complete KYC immediately after login.
- Implemented customer blocking/restriction functionality based on KYC verification status.
- Provided both manual admin controls and email-based verification workflows, configurable according to client requirements.
- Customized the module workflow and verification rules based on individual customer business requirements.

QuickBooks Integration (WHMCS)

- Developed a WHMCS integration with QuickBooks to synchronize business and customer data between both platforms.
- Implemented automatic synchronization for client creation and client profile updates from WHMCS to QuickBooks.
- Integrated synchronization of services, products, and invoice-related data between WHMCS and QuickBooks.
- Developed backend workflows and WHMCS hooks to trigger data synchronization based on relevant events.
- Reduced manual data entry by automating the transfer of customer, service, product, and billing information.

WHMCS Customization & Client-Specific Solutions

Order form customization in WHMCS

- Developed highly customized WHMCS order forms by replacing the default order form experience with a client-specific interface using PHP, Smarty, JavaScript, and jQuery.
- Implemented dynamic operating system selection with OS images, pricing-based configuration options, and conditional product configurations according to client requirements.
- Developed dependency-based product configurations, such as enforcing minimum RAM requirements based on selected SSD/storage options, along with multiple other custom validation rules.

Admin area customization in WHMCS

- Extensively customized the WHMCS Admin Area to improve the presentation and organization of client information and custom fields.
- Reorganized and grouped WHMCS custom fields into client-specific sections and forms according to business requirements.
- Used jQuery extensively to enhance existing WHMCS interfaces and implement dynamic UI behavior where direct modification of the core WHMCS interface was limited.

HostingSeekers - Company Comparison & Hosting Platform

Role: PHP Developer | Maintenance & Feature Development

- Worked on maintenance and feature development of the existing HostingSeekers platform.
- Developed and managed sponsored advertisements displayed across company and WordPress pages.
- Created functionality to manage and track ad impressions and clicks.
- Developed an advertisement dashboard to monitor company ad performance.

- Worked on company comparison pages, UI changes, bug fixes, and new features based on business requirements.
- Used PHP, Laravel, MySQL, JavaScript, jQuery, AJAX, and DataTables.

EDUCATION

Master of Computer Applications (MCA)
Lovely Professional University (LPU)
Punjab, India ()
